Dear Senior:

As a senior at Pembroke High School, you have the opportunity to complete a "Senior Project". The Senior Project culminates in fieldwork during the fourth term.

Seniors involved in Senior Project must:

1. Choose a topic/field of study
2. Select a community mentor within that field
3. Complete 25 hours of field work, as well as 3 journal entries (150 word min) per week
4. Produce, submit and maintain a portfolio and
5. Deliver a final presentation summarizing your experience

The Senior Project will provide you with a special form of learning and may even give you a glimpse into your future.

Choosing a topic for your Senior Project is the first and most important step in the process. Almost any topic is open to you. What have you always wanted to know more about or to learn how to do? What career or personal interest do you want to explore?

Choose a topic which genuinely interests you; do not wait until the last- minute; and choose a topic that relates to your life and the future you see for yourself.

Choose your project carefully, and your adventure will be exciting and challenging. It is this element of choice that really lends meaning to the Senior Project, and it is what makes it so unique.

This handbook clearly outlines the expectations and requirements your Senior Project must meet. Continuous support and guidance from the administration and faculty is available throughout the year to help make your project excellent and dynamic.

Put serious thought into your Senior Project and enjoy the challenges your choices will bring your way. The faculty and staff are proud to join you on this journey, and we look forward to helping you along the way.

Your signature below is an indication that you accept the terms as stated above.
